

Innovate UK

Global Alliance

KTN Global Alliance Africa is looking for Innovative Solutions to AgriFood Challenges in Kenya

KTN Global Alliance Africa is supporting **Flamingo Horticulture** to find innovative solutions to False Codling Moth Control in Fresh Chillies.

The Challenge

Thaumatotibia leucotreta (Meyrick), better known as the **False Codling Moth (FCM)**, is an economically damaging pest impacting a variety of alternative host plants across its natural range in sub-Saharan Africa. Flamingo Horticulture, a horticultural business with a worldwide footprint that covers the farming, production, sales and marketing of fresh produce and flowers, seeks innovative solutions to control FCM.

Flamingo is launching **2 challenges** looking for cross sectorial solutions to detect, screen and eradicate FCM.

What is Global Alliance Africa?

KTN Global Alliance Africa is a 6-year project, funded by UK Aid, that aims to promote job creation, inclusive growth and poverty reduction through knowledge transfer, skills building and opportunities to support businesses and innovations deliver scalable impact.

Through the Innovation Exchange programme we support innovation transfer by matching industry challenges to innovative companies from other sectors. We do this by putting large businesses with technical needs in contact with companies who have the right solutions for faster development of novel solutions.

Submit your Solution
